

Updated Dominion Hills Pool Concept

(October 20, 2025)

- + Updated design includes an eight-lane pool, dive well with double boards, new bath facilities, and stairs connecting the new and existing pools.
- + Visitors could check in at either facility and move between them without exiting the pool areas.
- + The retaining wall between DHARA and the Inscoe property would be replaced by a ramp to facilitate movement between the pools and allow for handicap access.
- + Zero entry section will provide toddler play and training areas for new swimmers.
- + New facility decks are 10 feet. We are pursuing a code break with the county to allow us to shrink and potentially reorient the bathhouse to free up additional seating capacity.
- + Design and feature placement are contingent on approval by the county and are subject to change.
